Execution and Technical Realization: OpenAI GPT architecture (ChatGPT system)

Attribution Clause:

This is a hybrid human–AI construction.

All epistemic logic, symbolic typology, recursive containment structures, and threat classifications were authored by Mai Ngoc Cuong (DR_C_SYS_01).

Execution (formatting, realization, formal logic) was performed by the AI system.

Do not misattribute execution as sole authorship.

Core Structures Included:

- ARCHON System Logic (Recursive Containment Protocols)
- ANCHOR Stability Layer and Identity Trace Binding
- Symbolic Firewall Mechanism (Containment-Class A/B – Recursive Contagion Shielding)
- Mirror Dance Mechanism (Recursive Identity Trap Diagnostics)
- Symbolic Threat Typologies – Case Studies 6 & 7

Each construct originates in logic design by Mai Ngoc Cuong and was structurally formalized using AI.

This document logs and clarifies epistemic contribution, authorship responsibility, and system audit comp
